

Demo Center: Hands-on Labs

Partner access to Demo Center via PartnerDirect

Partners get access to the Dell Technologies Demo Center using their Dell Technologies Partner Portal Individual account that is linked to their company's partner program. Demo Center is the self-service platform where partners can test drive Dell Technologies products and solutions using hands-on labs, videos, and other demo assets.

Start Here:

1. The partner enrolls in or works through their company's Dell Technologies Partner Program / Partner Portal access model.
2. If the partner is already a member of the Dell Technologies Partner Program, and a user just needs an individual login account, request a Partner Portal Account here: dell.my.salesforce-sites.com/SelfApplication
3. Once their Partner Portal account is active and linked to the company's partner program, use those credentials to access Demo Center.

If the partner does not yet have the correct portal access, they should work with their Partner Account Manager or internal partner program contact to complete Partner Portal onboarding before attempting Demo Center login.

Demo Center Access:

Go to democenter.dell.com

Click on **Sign in** and then select the **Partner Sign In** option. Complete the profile using the same Partner Portal credentials.

After signing in, partners can:

- access on-demand self-service demo environments
- use multiple demo types that support different stages of the sales cycle
- browse the full partner catalog including virtual and hardware demos
- use technical videos and shareable assets through Demo Center Rooms

Hands-on Labs are available 24/7, self-paced, and designed to help partners explore Dell Technologies products and solutions firsthand.

Sharing demos with customers:

Once logged in, partners can create Demo Rooms to share curated demos with customers using a personalized URL. To create a Demo Room, log in to Demo Center and go to the dashboard. Select **Demo Room** and click on the blue Create Demo Room button. Complete the Title, Brief, and Expiration Date fields then submit. Once the room is created, click on **My Rooms** and select the created room tile. From there, select the green **Share Room** button and copy and send the **Demo Room URL** to your customer.

Customers will need to authenticate with a Dell Account to access a lab. If they don't have one already, they can simply scroll to the bottom of the sign in page and choose the Create an Account link. They should then use these credentials for Demo Center labs going forward.
